The Comintern

11. Agents from all nations are being trained in the secret Soviet universities where learned theorists and practitioners of the Comintern lecture. Many of the students are Jews who have been recruited from all over the USSR and the larger countries of the world.

CONFIDENTIAL
Approved For Release 2009/09/01: CIA-RDP81-01035R000100020005-5

- 12. Stress is being laid chiefly on revolutionary techniques, intelligence work, folitical subversion, and organization of strikes, demonstrations and manifestations of all kinds, as well as on conspiratorial work.
- 13. The Central Committee of the LKP-b is studying suggestions for the further division of certain states after some stabilization has taken place. These proposals aim to facilitate Soviet domination by weakening the states. Czechoslovakia, for example, would be split into two republics, the Chech and Slovak; Yugoslavia would form three, the Scrbian, Croatian and Macedonian, Hungary, and Rumania after the ouster of King Michael, would be reduced by the establishment of an autonomous state, the Transylvanian Republic, and the Banat, which would be divided into national cantons. The Silesian territory also would be made autonomous, in view of economic interest. The latter is a sop to the German Communists who have demanded Silesia and East Prussia.
- 14. Molotov believes these proposals are good but that their activation, or even publication, now would be a grave error.
- 15. The MRP-b has issued orders for all sections of the Comintern to infiltrate and dominate trade unions and workers! parties. It hopes thereby to achieve decisive influence and to be able to organize mass strikes which will completely disorganize the economic life of its capitalist adversaries.
